

Empathy Module Activities

Introduction

The Empathy Module is part of the Teacher x AI Co-Creation Platform. It is designed to help students build perspective-taking, emotional literacy, and tolerance - skills critical to social harmony and learning motivation, especially in multicultural classrooms.

Target Audience

Recommended for students in Grade 3 and above. Activities can be adapted for both primary and middle school levels.

Activity Examples

1. Role Reversal Stories

Students are given fictional situations of conflict (e.g., being excluded at lunch), then asked to rewrite the scene from the other person's perspective.

2. Emotion Card Match

Pairs of students select emotion cards and describe real-life situations where they or others felt that way. AI can suggest reflection questions like:

"What does anger try to protect?" or "What does sadness need?"

3. Perspective Interviews

Students are assigned to interview peers with different backgrounds or opinions (e.g., about a school rule), and then summarize that person's viewpoint respectfully.

Suggested Extensions

- Use as weekly reflection journals
- Involve parents in home empathy reflections
- Combine with AI-assisted journaling prompts for deeper metacognition
