Teacher × AI Co-Creation Platform

This platform is part of the Lori Framework initiative, designed to assist educators in:

- Reflective teaching collaboration with AI
- Emotional stress support during teaching
- Embedding empathy and civic thinking into the classroom

Core Modules:
1. Empathy Module
   - Roleplay-based activities, moral dilemmas, and gratitude exercises.
2. Stress Support Tools
   - AI-assisted emotional relief dialogues, rephrasing suggestions, and journaling.
3. Teacher Feedback Loop
   - Logs and adapts to teacher reflections on lesson outcomes and planning.

Workflow:
- Teachers input teaching goals, stress triggers, or ethical needs.
- AI responds with non-intrusive, context-sensitive suggestions.
- Teachers decide whether and how to use AI input.

Design Principles:
- Teacher authority first
- No automated classroom decisions
- Culture-aware interaction
- Emotional labor is respected
